

Partner in Healthcare Outsourcing for **Medical Transcription and Document Management**

ACCEL Healthcare Resources provides services and solutions to improve efficiencies for maintaining medical records. If you are considering implementing Electronic Medical Records (EMR), we can show you a roadmap to take your practice from medical transcription to EMR transparently, without disrupting the physicians' process of interacting with their patients. We start by letting you manage your medical transcriptions as efficiently as possible and then transitioning you to "EMR-Lite", a simplified version of EMR; always keeping in mind that technology solutions should be built around the "patient-doctor" relationship. Any technological aids must be intuitive, non-invasive and adaptable. We do this without having to spend tens of thousands of dollars on complex EMR systems.

Digital Dictation

For your convenience, we provide a toll-free number so that you can dictate using a phone from anywhere in the continental US. Some physicians like the convenience of recording their dictations throughout the day and sending them later as a single batch. For them, we recommend the use of a portable digital recorder like the Philips 9370. We can support other brands of digital recorders as well.

Medical Transcription, Document Management and Patient Charts

ACCEL offers three service levels for medical records creation and management. Our Silver Level is for those who need excellent quality of transcription with basic electronic document delivery. We transcribe dictations and send them by email or secure FTP transfers.

The Gold Level service provides workflow automation and document management functions. Our workflow solution lets you manage the entire process of sending dictations, receiving transcriptions, reviewing and editing these documents, applying a digital signature and sending copies to a referring physician electronically. No more reports or letters to print and mail!

The Platinum Level adds Patient Charts functionality. We also call it EMR-Lite. It offers the physician the most important functions of a "digital patient chart" without the complexity of a full-featured EMR.

Service Levels	Medical Transcription	Electronic Documents	Web Access Anywhere	Digital Signatures and Routing	Smart Search	Archival and Storage	EMR Lite
Silver	✓	✓					
Gold	✓	✓	✓	✓	✓	✓	
Platinum	✓	✓	✓	✓	✓	✓	✓

The Silver and Gold services are priced on a per line basis. The Platinum level (for EMR-Lite) is offered for a fixed monthly fee per physician. For a detailed understanding of the different service levels, please ask for a demonstration.

Document Management Platform

Overview

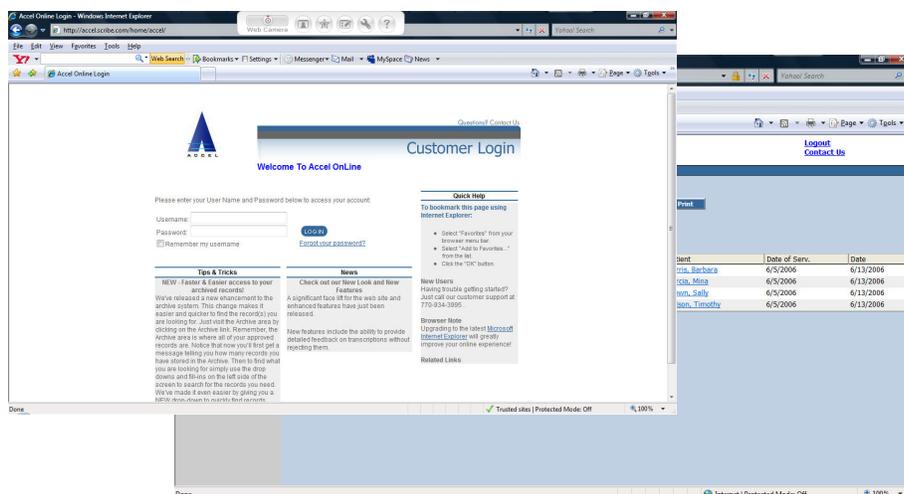

ACCEL has partnered with technology companies offering the best of breed workflow solutions to make your transcription and document management process simple and effective. The Document Management Console (DMC) is a web based application offering secure “anytime anywhere” access to clinical data. It is a one-stop solution for physicians, medical records professionals, administrators, and other clinical staff to access and communicate patient information, allowing institutions and healthcare professionals to embrace technology at their own pace by adding modules when they are ready.

Features

The online system provides a platform to view, manage and securely communicate documents through any Internet connected PC, without the need for additional equipment, software or network installations.

On the Document Management Console, our clients can:

- ✓ Review, edit, print and approve transcribed reports using Microsoft Word or text format.
- ✓ Efficiently and quickly email, fax and securely share records with other physicians, insurance companies and others that require patient information.
- ✓ Add, review and approve any clinical information including lab results, x-rays, images and videos (Feature of Patient Charts / EMR-Lite).
- ✓ Access patient records from any location, not just where the paper file resides.
- ✓ Search clinical records for key phrases, conditions, pharmaceuticals or indications.
- ✓ Track and limit patient record access for HIPAA compliance, patient privacy and data security.

ACCEL Healthcare Resources, is a proven and established service provider to the Healthcare industry. ACCEL is a global company with customers and operations in North America and Asia.

Philips Portable Digital Dictation System

Philips Digital Recorder

Pocket Memo 9370 Digital Recorder

The Digital Pocket Memo 9370 is always ready to take your dictation. Handy, powerful and efficient, you can easily control the latest recording technology with push buttons. With an exchangeable SD card, you have virtually unlimited recording capacity and the .dss file format produces excellent sound quality. Physicians can now transition to a digital dictation device effortlessly.

Storing and Sending Dictation

Dictations are stored on the Secure Digital (SD) memory card. A 256MB card will store over 44 hours of dictation. The dictations are transferred directly to a PC via an USB port. The software then transfers the recorded dictation to ACCEL's dictation system and archives the voice files in the client's PC as a backup.

Secure Digital Card

Philips 9120 Docking Station

Docking Station & Charger (option)

The docking station and charger is a convenient way to automatically download your recorded voice files to a PC and extend the battery life by recharging the recorder, all in one sleek unit. The charger works with Philips NiMH batteries.

One digital recorder is recommended per physician. The Docking Station and Charger can be shared between multiple digital recorders.
